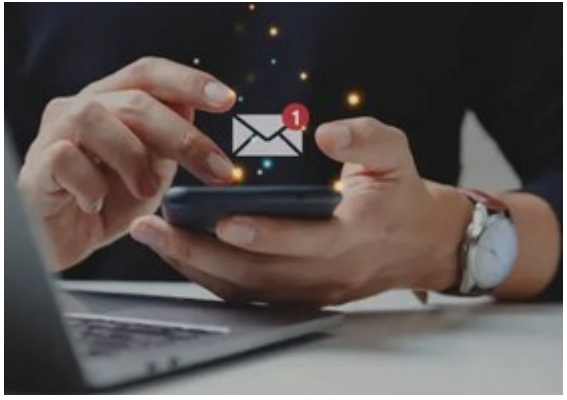
# Menu’s



# Contents

- Slide 3-4 Discussions
- Slide 5 Menu’s
- Slide 6 In Conclusion
- Slide 7 Happy Ending

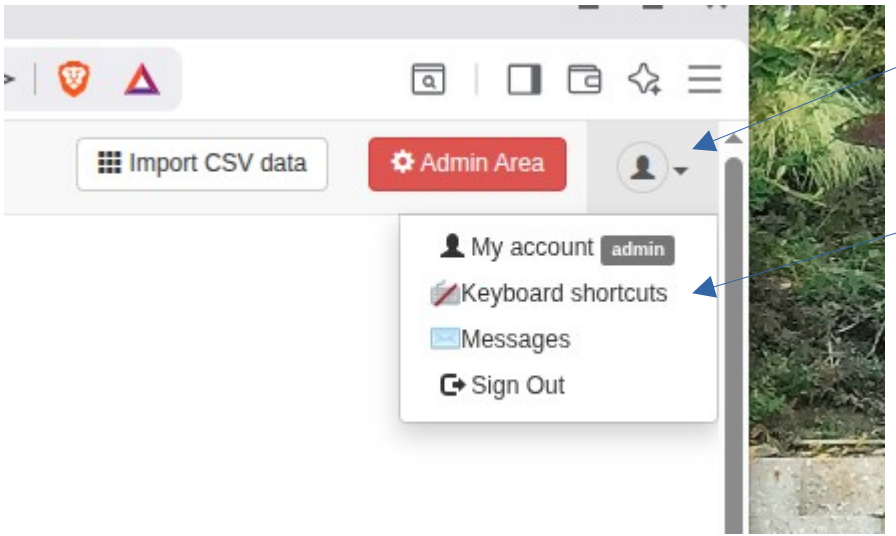
# Discussion

- The Publication for helping users of the Ratsupport.com mySQL Datase Applications.
- This pub covers the things that are most useful and common in the Applications.
-

# Menu Discussion

- There are a couple of Menu choices located throughout the Application
- I will show you how each works later in the Publication.

# Menu’s



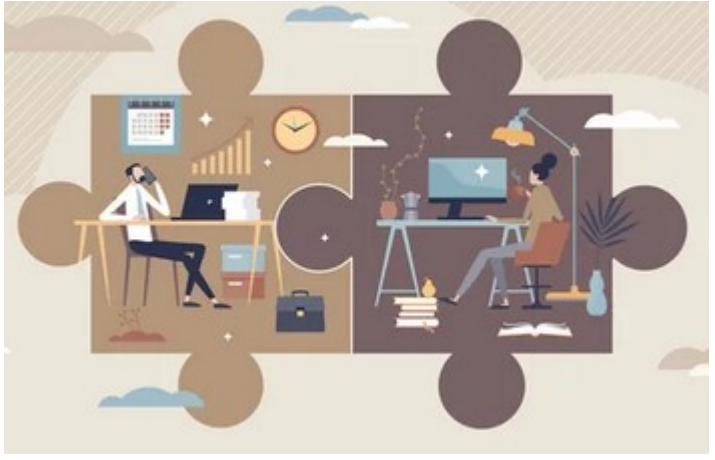
To use the User Menu you need to Left Click on the Circle with a head in it and you will see this Menu.

Note there are a couple of Items in your menu.  1. My account (with your username) has many things to look at.

2. The Messages can be used if you Left Click on this Menu Item and will be discussed later.

3. Sign Out and this should happen when you are no longer using the app.  Your not using the Sign Out you can cause an update problem if you app is revised.

# In Conclusion

- I hope this Presentation was helpful.
- Please use the Ratsupport.com Contact Us Page if you have any questions, suggestions or comments.
- The Ratsupport Database Applications can be used with a Web Server or a Private Computer running a Web Software like XAMPP.
- We will be very happy if you have a requirement for a Database Application and create a Demo App for you.


# Happy Ending
