# Discussion

- If you are interested in this Application you will need to Sign Up and wait for the Administrator to accept you. You will get an email from [support@ratsupport.com](mailto:support@ratsupport.com). Please make sure you have this email address in your address book.
- It is best to have the application open so you can follow this presentation and see the actual pages as you progress through these slides.
- The more recipes in the database the easier it is to do data entry. This is because of the structure of the tables.
- The ingredient, unit fields are unique and have a small red asterisk next to the field label. This allows for the users to select already entered data.

# Discussion

- This Recipes DB was created to allow contributors to share their favorite recipes.
- Please check out the Tricks & Tips section to help make the DB less of a hassle.
- As a contributor you will be able to add new recipes and update information in the database.
- Corrections and additions may be records created by others so be careful. The Editing and Deleting of records is a Group permission.

# Discussion

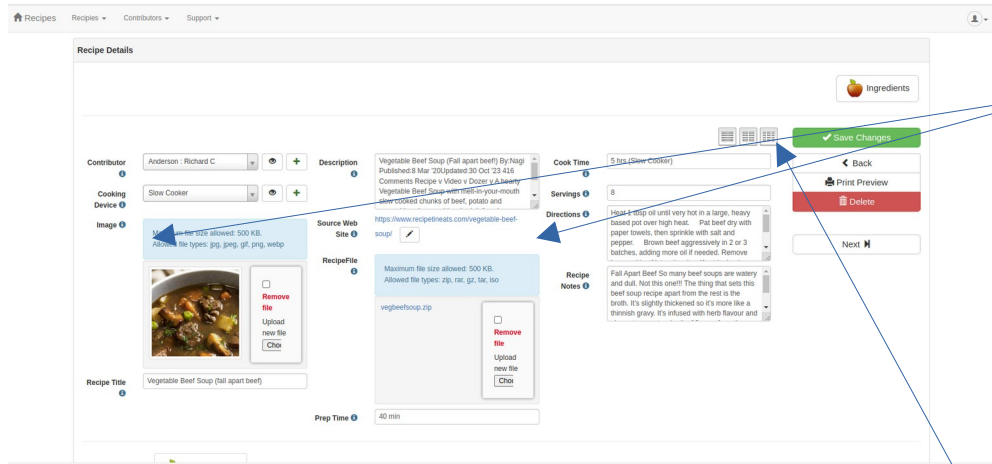

- If you have questions on the operation of Ratsupport.com Database Applications then you can go to the Demo Servers Application Page and check out the Application Instruction Presentations by clicking on the proper accordion tab.
- The Basic use of Ratsupport DB applications presentation covers most of the operational items for all similar database applications.
- 
- Images and Files are limited to 500kb. The contributor is responsible for this limit. The Files download is limited to compressed files so the contributor will have to compress their file (Zip etc).
- The allowable compression formats are zip, rar, gz, tar, iso.
- The allowable Image formats are jpg, jpeg, gif, png, webp.

# Tricks & Tips

- As there are some Lookup Fields that will have many data points it will be necessary for the contributor to learn to just put the first letter or two of a choice and the field choices will go to that data item.
- When entering new data please try to follow the format of others. Using upper / lower case do not sort the same.

# Tricks & Tips

The small blue circles by field names is an icon to allow the user to view descriptions and information on that field.

The contributor can change the number of columns the data is displayed format. One, Two and Three columns are available if you have the browser in a resolution and size to allow it.

The contributor selects this using the column icons.

Records 1 to 7 of 7

Records per page 10

Powered by BigData Appz 24.17

Please note that the notes on each record does not display in table view.

There are multiple pages of the ingredients so you can use quick search to find what you are looking for.

You can also use the filter to show selected records.

# Ingredients Detail View

The screenshot shows the 'Ratsupport Demo Recipes Database' interface. At the top, there is a navigation bar with links for 'Recipes', 'Contributors', 'Support', 'Admin', 'Import CSV data', and 'Admin Area'. Below the navigation bar, the page title is 'Ratsupport Demo Recipes Database' by Ratsupport.com. A small note states: 'This database was created to allow users to share their favorite recipes. IMPORTANT !! If you Signed in then Please Sign Out after completing data entry. This is a demonstration database to show the use and versatility of this type application.' Below this, there is a section for 'Ingredients' with an 'Add New' button. The main content area is titled 'Ingredient details' and shows a form for editing an ingredient. The form has a table with the following data:

ID	Recipe	Measure	Ingredient
1	Vegetable Beef Soup	1/2	Olive Oil

Each row in the table has an eye icon and a plus icon to its right. To the right of the table, there are several buttons: a green 'Save Changes' button, a 'Back' button, a 'Print Preview' button, a red 'Delete' button, and a 'Next' button.

If an ingredient is already in the table it will show up here. To edit the information in a field the contributor needs to click on the eye icon. To enter a new item into the table they need to click on the + icon.

Be sure you click on the Save or Save Changes button (Green).

# Ingredient Filter View

The screenshot shows a web application interface for filtering recipes. At the top, there is a navigation bar with links for 'Recipes', 'Contributors', 'Support', 'Admin', 'Import CSV data', and 'Admin Area'. Below the navigation bar, the page title is 'Ratsupport Demo Recipes Database' by Ratsupport.com. A small text block explains the database's purpose and includes a warning: 'IMPORTANT: If you signed in then please sign out after completing data entry. This is a demonstration database to show the use and versatility of this type application.' The main section is titled 'Ingredients Filters' and contains several input fields: a 'Recipe' dropdown menu, an 'Ingredient' dropdown menu, and an 'Order by' section with three rows of 'order by', 'then by', and 'then by' dropdown menus. At the bottom of the filter section, there are three buttons: a green 'Apply filters' button, a white 'Save & apply filters' button, and an orange 'Cancel' button. A 'Switch to advanced search mode' button is located in the top right corner of the filter section. The footer of the page reads 'Powered by Rightof.app@in.24.17'.

By filling in the desired info into the fields of the filter will allow the contributor to select desired records.

After putting in your selection data just click the Apply Filters button (Green).

# Happy Endings
