News Letter #25 July 2015

This news letter is intended to help the people that I enjoy doing business with and anyone else that happens upon this news letter.

If you don't want to get this news letter on a regular basis then feel free to email me at [support@ratsupport.com](mailto:support@ratsupport.com) and tell me you don't want to be on the list. I will remove you from the news letter list.

1. Well I am publishing the Ratsupport Newsletter again. The reason is simple, I have a number of people that asked me to publish it again and I have much to say. So here goes again.
2. If you have not been at Ratsupport.com lately, you might want to go there and see all the changes. One of the important changes is that instead of using http:// you should use https://. I am using Secure settings and you should see the lock by the URL of your browser.
3. The website is now responsive. What that means is that if you use a smart phone or tablet the site will appear different. The site will try to change itself to fit your device.
4. We now have a Members Only Area of the Website. A person must register and then an email will be sent to them giving them their username and password. Please feel free to join and use the new tools in the Members Only Area. Some of the new things are Video, Mobile and Text chat. Please use the Edit Profile menu link to update your profile or change your password.
5. I guess the most important thing to most of you is that I am Moving to Idaho at the end of September 2015 to live with my son and daughter in law. I am looking forward to this but do not want to leave all my good people without help. That is the reason for all the changes to the website. I want to be able to keep in communication and be able to help people.
6. Windows 10 is on it's way. I must say that I have a preview copy of Windows 10 and I think it is very good. You will want to do the upgrade when it becomes available July 29 2015. If you are a windows 7, 8.0 or 8.1 user it will be a free upgrade for the first year. I strongly suggest you do the upgrade. If you are still running windows xp then I suggest you do some looking into upgrading your machine or purchasing a new one. Windows XP is not supported anymore.
7. If you do not have the \$\$ to purchase a new computer then I suggest you put Linux on your XP machine. The cost of the operating system is \$0.00. If you are interested please contact me at Ratsupport.com. [Ratsupport Contat Us](#) I can gladly give you advice on what is necessary and the procedure to do the update.
8. I must say it feels good to be working on this News Letter again and am looking forward to publishing one every Quarter or so. I will publish one if I find something special or necessary to let all the good folks know about.
