

Ratsupport.com News Letter

Date: 08/14/2015

News Letter #27 August 2015

This news letter is intended to help the people that I enjoy doing business with and anyone else that happens upon this news letter.

If you don't want to get this news letter on a regular basis then feel free to email me at support@ratsupport.com and tell me you don't want to be on the list. I will remove you from the news letter list.

1. I have found an application that I think most of you might want. It is called Unchecky and it tries to keep unwanted programs, apps and tool bars etc. from being installed on your computer. This will come in handy when trying to do the Java, Adobe Reader, Adobe flash updates and others. Check it out on my website: [Members Education, Unchecky](#)
2. Well something is going on with my Ratsupport Members Only Area. It appears that some of the emails sent from my applications are going into peoples Spam (Junk) folders and not to them. **Please make sure you add support@ratsupport.com to your contacts in your email system.** Please tell your friends about the Ratsupport.com website and the Members Only Area, all are welcome.
3. For those using their tablet or smart phone, I have made a presentation that will help, by putting a icon on your smart device and make getting to your favorite sites much more easy. [Ratsupport How To's](#) Look for the menu item “ HowTo's associated with your Smart Device, phone, tablet etc.. The presentation is “ How to Put a Web Link on your Smart Device Home Screen. Enjoy :-)
4. If you have updated your computer to Windows 10, please let me know. I am interested. I am also interested in how many are still using Windows XP. Please include friends info if you feel like it.
5. I found an interesting web site that some of you might like. [Dashlane](#) , it is a application that keeps track of your passwords and if you use the basic service it does not cost. I found it too much to deal with while doing my programming, but you might just like it so I am telling you about it. I did many tests and it seems to be a good application that is malware free.
6. As before, if you don't want this news letter just let me know and I will gladly take you off my mailing list. [Contact Us](#)
